Distillation Fume Hoods

Walk In Fume Hoods

Laboratory Chemical Fume hood is an enclosed safety device designed to extract air inwards by mechanical ventilation to protect the hazardous working environment from harmful vapors, gases, dust, and fumes.

- Constant air volume hoods are commonly known as CAV. Regardless of the sash position, the amount of air volume exhausted remains constant.
- Variable air volume fume hood commonly known as VAV. Airflow is modulated based on the Sash height and maintain safe face velocity at all sash positions.
- Validation of fume hoods for effective operation is performed after installation of the fume hoods.

Laboratory Accessories

- Gas Distribution Systems
- Electrical Fixtures & Utility Panels
- Eyewash Stations & Safety Showers
- Specialized Lab Fixtures & Faucets
- Exhaust Systems & Ventilation Solutions
- Chemical-Resistant Sinks & Drain Systems

LAB FURNITURE

LAB FURNITURE

At Visionaire Lab Systems, we provide end-to-end solutions for Laboratory solutions, from designing, Manufacture to installing laboratory furniture. Furniture designing place a vital role in establishing a new laboratory. The proper planning on where to place the lab table, sink table, fume hood, anti-vibration table, chemical storage cupboard matters largely. We manufacture the best-in-class laboratory furnitures. Visionaire Lab Systems promises to provide the best laboratory furnitures that suits your lab requirements.

- Floor Mounted
- C-Frames
- Wall Cabinets
- Service carriers
- Anti-vibration Tables
- Suspended Cabinets
- Tall Storages and Racks
- Vented Storage Cabinets
- Safety Storage Cabinets
